Keep data secure across the enterprise with the world's most powerful compression & encryption software

Businesses process an enormous amount of information every day and the amount of information grows exponentially every year. Consider storage capacity limits, sensitive client information, increasing government regulations, valuable intellectual property, a decentralized and global workforce and a handful of other hurdles, and it's easy to see why successful organization management is so difficult.

WinZip 24 Enterprise enables businesses and government agencies to meet goals and objectives more quickly with a one-stop solution that empowers individual contributors to create and share their best work, while upholding the protocols and standards required to protect IP and sensitive data from threats.

WinZip 24 Enterprise Key Features

For employees

- **NEW!** Built-in search lets you find files whether they are stored locally, on the network, or even in cloud storage
- **NEW!** Share files and zip files via enterprise cloud services such as Google Cloud, IBM Cloud, Rackspace, SwiftStack, Openstack, Alibaba , Wasabi, HP, Oracle, Azure, WebDAV, CenturyLink, IONOS and OVH; streamlining workflow and eliminating unnecessary steps
- **NEW!** Create backup jobs from Explorer and use the Job Wizard to back up personal files in a Windows Protected Environment (WIP), without having to manually suppress work files
- **NEW!** Combine multiple PDF files into a single pdf to save, zip, and share. Plus, convert documents to PDF, add watermarks, and resize images
- **NEW!** Use predefined background tools or create custom tools that help to securely remove, zip or relocate unused files
- **NEW!** Access Windows Shell Extensions from WinZip Files pane. Expanded file and folder pinning options in Files pane
- **NEW!** Direct Access improves performance for viewing and unzipping large Zip files stored in the cloud
- **NEW!** ZSTD method in Zipx compresses faster and more efficiently for many file types
- Unzip all major formats. including Zip, Zipx, RAR, 7Zip, BZ2, LHA/LZH, VHD, XZ and more
- Browse, open, edit, zip, protect and share files stored locally in Windows HomeGroups, on networks, or in supported clouds
- Access WinZip features in other applications with WinZip Express Add-Ons
- Work on almost any smart device with touch-friendly features
- Add multiple accounts for the same cloud and IM services, and name them uniquely
- Move selected files to individual zips with optional encryption to easily share single files
- Easily view height. width. pixels per inch pixel depth/colors, file size and other image details in the Preview Pane

For IT administrators

- Hide ribbon buttons conceal disabled features to avoid confusion
- Enterprise-wide password in place for data loss prevention (DLP)
- Control access to cloud storage, enforce AES encryption (128- or 256-bit), set password protocols and more
- Offer employees secure sharing across email, SharePoint, Amazon S3, and IT-approved cloud accounts
- Meet U.S. government requirements for FIPS 140-2 encryption, while at rest and during exchange
- Set WinZip to FIPS 140-2 compliance, even if Windows OS is not in FIPS 140-2 mode
- Ensure Windows Information Protection (WIP) protocols are respected when employees are using WinZip 24
- Reduce attachment sizes and secure email with Courier 9, which supports powerful FIPS 140-certified AES encryption and wipes temp files
- Open a Virtual Image file and view the content and extract files to another location. WinZip 24 includes support for VHD files, including NTFS compressed files and VMWare files

Also includes:

- "Shredding" (auto-wipe) of files using the U.S. Department of Defense standard (DOD 522022-M) to prevent misuse
- Free 'WinZip Command Line Support Add-On' for scripting
